- Gombe High School   2012 - 2018
- Gombe Children School   2006 - 2012

QUALIFICATION OBTAINED WITH DATES

- National Youth Service Corps (NYSC)   2023
- B.Sc. in Software Engineering   2022
- Senior Secondary School Certificates   2018
- First School Leaving Certificate   2012

INTERESTS & HOBBIES

- Coding
- Playing Football/Games
- Travelling
- Making Friends

WORK EXPERIENCE

Java Developer | Ministry of Finance, Gombe State (2022 – 2023)

Utilized Java development expertise to support the initiatives of the Ministry of Finance in Gombe State, contributing to the enhancement and implementation of software solutions.

Java Developer Intern | Briatek Computer Nigeria Limited (2021 – 2022)

Completed a dynamic internship and industrial training as a Java Developer at Briatek Computer Nigeria Limited, actively contributing technical expertise to various software development projects. Engaged in hands-on learning experiences and collaborated with seasoned professionals, gaining valuable insights into real-world software development practices.

Spring Boot Developer | Orellions Technologies (2021 – 2023)

Contributed as a Spring Boot Developer at Orellions Technologies, focusing on the development and maintenance of robust and secure systems for the organization.

SKILLS

- **Microsoft Office Suite:** Proficient in Microsoft Excel, PowerPoint, Access, and Word, utilizing these tools for efficient data management, presentation creation, and document processing.

- **Programming Languages:**
  - **Java**: Proficient in Java programming, utilizing its versatility and object-oriented features for robust and scalable software development.

  - **Spring Boot**: Experienced in developing backend applications with Spring Boot, employing its conventions and frameworks for streamlined Java-based projects.

As a Java Developer:

I harness the power of Java to build scalable and efficient backend solutions, leveraging its versatility and object-oriented principles. With extensive experience in Spring Boot, I go beyond conventional development, utilizing its streamlined process and comprehensive set of tools to create enterprise-grade applications.

Full Stack Desktop Application Development With Java:

In addition to my proficiency in backend development, I excel in building full-stack desktop applications using Java. Whether independently or in conjunction with frameworks like Spring Boot, I demonstrate the capability to develop end-to-end solutions. This includes crafting responsive user interfaces, implementing backend server logic, and ensuring a seamless user experience throughout the application.

  - **ReactJS**: Skilled in building dynamic user interfaces with ReactJS, leveraging its component-based architecture for creating efficient and modular front-end solutions.

  - **React Native:** Proficient in cross-platform mobile app development with React Native, creating high-performance applications for both iOS and Android platforms.

- **Database Management:**
  - **SQL**: Competent in database design and management using SQL, ensuring efficient data storage, retrieval, and manipulation for optimal application performance.

- **Version Control:**
  - **Git:** Well-versed in using Git for version control, enabling collaborative and efficient software development processes.

PROJECT EXPERIENCE

1. Banking System Desktop App
Role: Developer
Description: Developed a robust desktop application for a banking system using Java. Implemented features such as user account management, transaction processing, and security protocols.
GitHub: https://github.com/Abdul-Barambu/banking-management-system

2. Backend Authentication System with Java and Spring Boot
Role: Developer
Description: Implemented a complete backend authentication system using Spring Boot, incorporating JWT (JSON Web Tokens), token management, and robust security protocols. Designed to provide secure authentication for web applications.
GitHub: https://github.com/Abdul-Barambu/complete-authentication-system

3. Food Recipe Mobile App in React Native
Role: Developer
Description: Created a mobile app using React Native for exploring and sharing food recipes. The app provides a user-friendly interface, recipe categories, and step-by-step cooking instructions.
GitHub: https://github.com/Abdul-Barambu/food-recipe-NativeApp

ADDITIONAL PROJECTS
In addition to the projects listed above, I have worked on numerous projects in Java, Spring Boot, ReactJS, and React Native. All of these projects have been pushed to GitHub.
You can find all my projects on GitHub for further assessments. Feel free to connect with me on other platforms:
